

ControlFlow®

Two-Way Security Revolving Door System

The ControlFlow® two-way automatic security revolving door system provides controlled access to secure areas of a facility while enhancing the intrinsic beauty of your building. The ControlFlow® two-way uses the latest in sensor technology coupled with biometric or card access to allow free movement of authorized users and deny access to would-be intruders – every time.

Additional benefits include:

- Superior aesthetics with mat-less design
- Audible alarm warns of an unauthorized intrusion attempt
- Automatically resets after violation
- Immune to shadows, reflections, and environmental changes

Aesthetically beautiful

Your choice of access control

Seamless integration for new construction and retrofits

Advanced sensor technology
